AUTHOR INDEX OF ORIGINAL ARTICLES

ALBERT, OSCAR, isolation of *bacterium linens*, 765

AMERICAN DAIRY SCIENCE ASSOCIATION, announcement, 217, 289, 974, 1070

AMUNDSON, H., acidity of pasteurized skim milk inoculated with lactic starters, 909

ANDERSON, E. O., pasteurization of ice cream mix, 37

ARBUCKLE, W. S., microscopy of ice cream, 683

ARCHIBALD, J. G., manganese in cows' milk, 325

ARNOLD, FLOYD J., combining associations, 722

ARNOLD, P. T. DIX, citrus molasses, 735

ARNOLD, R. B., bactericidal action of radiant energy, 309

ATKESON, F. W., effect of spraying cows with repellent sprays, 179; fly control in dairy barns, 219

BABCOCK, C. J., oxidized flavor in milk, 1; standardization of scoring, 63; copper tolerance of milk, 563

BABEL, F. J., bacteriology of butter cultures, 83; manufacture of a new type cheese, 331; fat acidities of cheddar cheese, 773

BARBER, F. W., positive phosphatase test in refrigerated, pasteurized cream, 343

BARTLETT, J. W., fertility of bull semen, 983

BEACH, B. A., observations on mastitis, 471

BECHDEL, S. I., fermentation in legume silage, 734; additional vitamins A and D in calf starter, 741

BECK, G. H., estimating the number of spermatozoa, 69; estimating the quality of bull semen, 483; effect of dilution rate on spermatozoa, 756; effect of dilution rate on spermatozoa, 1057

BECKER, R. B., citrus molasses, 735

BELL, R. W., heat stability of milks, 571; color and heat stability of evaporated milks, 579; heat stability of concentrated milk, 1071

BENDER, C. B., acetic acid as a nutrient, 13

BERRY, M. H., carotene requirements, 740; value of kelp meal in rations, 754

BEROUSEK, E. R., controlling genital infections, 755

BOHSTEDT, G., comparative value of urea and linseed meal, 647; urea as a protein substitute, 732

BORGMANN, A. R., fly control in dairy barns, 219

BORTREE, A. L., ascorbic acid stimulation, 553

BOSSHARDT, D. K., carotenoid pigments in milk fat, 769

BOUTWELL, R. K., growth-promoting value of butter fat, 429

BOWLING, G. A., growth studies with Ayrshire cattle, 47; first records versus the average of all records in proving sires, 967

BOYD, J. C., butter score and mold mycelia grade, 1091

BRANTON, CECIL, alyce clover hay for milking cows, 736

BRATTON, R. W., influence of quality of protein on milk production, 730

BROWNELL, S. J., factors influencing success in artificial insemination, 723; proving sires and brood cows, 729

BRUNNER, J. R., relation between fat solidification and churning time, 169

BUTTON, F. C., stability of certain milk properties, 515

BYERS, J. H., value of chlorine in producing low bacterial count milk, 277

CANNON, C. Y., soybean and silage ration, 241; reestablishment of the arterial supply to the udder, 841

CAULFIELD, W. J., visual mold test for cream, 375

CLAYDON, T. J., medicinal flavor in market milk, 587

COLE, H. H., bloat in cattle, 929

COMBS, W. B., alkalinity of milk ash, 769; condensed and powdered sweet cream buttermilk in ice cream, 770; pasteurizing high acid milk for cheesemaking, 771

COMMITTEE REPORT, silage methods, 213; pasture investigations technique, 353
CONE, J. FRANK, oxidized flavor in milk, 1
CONKLIN, C. T., first records versus the average of all records in proving sires, 967
COONEY, MARILYN R., effect of cocoa upon utilization of calcium and phosphorus, 951
CORBETT, W. J., development of oxidized flavor, 419; oxidized flavor of milk, 1095
COTTER, J. W., urinary excretion of ascorbic acid, 744
COULTER, S. T., pasteurizing high acid milk for cheesemaking, 771
CRANE, J. C., phospholipids in dairy products, 935
CUPPS, P. T., effect of dilution rate on spermatozoa, 756; effect of dilution rate on spermatozoa, 1057

DAHLE, CHESTER D., prevention of oxidized flavor, 25
DAVIS, GEORGE K., citrus molasses, 735
DAVIS, H. P., live weight and milk-energy, 625; breeding efficiency in dairy cattle, 757
DAVIS, R. N., preservation of sweet milk and cream, 768
DECKER, C. W., microscopy of ice cream, 683
DEYSHER, E. F., heat stability of milks, 571
DOAN, F. J., direct reading pH meter for routine examination of milk, 271; definition for homogenized milk, 893; ascorbic acid content of evaporated milk, 1031
DORNBUSH, A. C., effect of ultra-violet irradiation, 643
DOWD, L. R., pasteurization of ice cream mix, 37
DOWNS, P. A., standardization of scoring, 63
DUNCAN, C. W., ascorbic acid stimulation, 553; poikilocytosis in dairy cattle, 738; cobalt studies, 739
DUNKLEY, W. L., fat globule clustering phenomenon, 763
DUNN, H. O., the modified Whiteside test for mastitis, 295

ELLIKER, P. R., mold mycelia in butter, buttermilk, and wash water, 768; effect of *Pseudomonas putrefaciens* on diacetyl, 943
ELLIOTT, IRVINE, estimating the number of spermatozoa, 69; factors influencing success in artificial insemination, 723; effect of dilution rate on spermatozoa, 756; effect of dilution rate on spermatozoa, 1057
ELLIS, G. H., oxidation of vitamin A and carotene, 869
ELVEHJEM, C. A., growth-promoting value of butter fat, 429
EPPLE, W. F., oxidized flavor, 525
ERB, J. H., war restrictions, 762
ESPE, D. L., soybean and silage ration, 241; reestablishment of the arterial supply to the udder, 841
EVANS, R. F., Junior D. H. I. Associations, 721
EWALT, H. P., value of chlorine in producing low bacterial count milk, 277
EWBANK, F. C., oxidation of butter oil, 409

FABIAN, F. W., bacteria content of frozen cream, 959
FICK, H. F., color and clarity of casein plastics, 591
FITCH, J. B., genetic aspects of persistency, 447; effect of thyroidectomy, 744; effect of thyroidectomy upon lactation, 745
FOSTER, EDWIN M., bacteriology of brick cheese, 833
FOUTS, E. L., standardization of scoring, 63; citrus molasses, 735
FRAZIER, W. C., positive phosphatase test in refrigerated pasteurized cream, 343; bacteriology of brick cheese, 833
FUHR, IRVIN, effect of ultra-violet irradiation, 643

GALLUP, W. D., carotene content of prairie hay during storage, 742
GAREY, JOHN C., bacteriology of brick cheese, 833
GARRETT, O. F., acetic acid as a nutrient, 13; the modified Whiteside test for mastitis, 295; calcium and phosphorus content of cottage cheese, 305; bactericidal action of radiant energy, 309; oxidized flavor in milk, 337; stability of certain milk properties, 515; carotenoid pigments in milk fat, 769

GARRISON, E. R., lactose-fermenting yeasts in sour cream, 767
GEARHART, C. R., conscientious objectors as D. H. I. A. fieldmen, 719

Dry matter,
determination in silage, 545
Dry milk,
future of, 716
Dry period,
effect on subsequent lactations, 705

ENZYMES,
crystalline rennin, 53
from chicken proventriculi, 331
Ether extract,
of Babcock test fat, 883
Evaporated milk,
ascorbic acid content, 1031
effect of forewarming on, 571, 579
heat stability, 1071
high solids content, 761
Extension breeding committee report, 724
Extension exhibits committee report, 718

FAT,
emulsion of frozen cream, 619
estimation by Babcock test, 883
globule, clustering phenomena, 763
nutritive value of, 429
oxidation of vitamin A and carotene in, 869
Feeding,
effect on carotenoids of milk fat, 769
effect on vitamin A of milk, 673
kelp meal, 754
studies, method for, 1011
Fermentation,
lactic acid, 371
Food poisoning, 321
Food value,
of butterfat, 429
Forewarming,
effect on heat stability, 571, 579
Flavor,
butter,
effect of peppergrass on, 505
milk,
medicinal, 587
of frozen sweet cream, 609
oxidized, 1, 25, 337, 495, 563
scoring, 63
Fly control in dairy barns, 219
Fly sprays for cows, 179
Fumigation of dairy products, 205

GELATIN,
in ice cream mix, 189
Genital infections,
control by artificial insemination, 755
Goat,
experimental mammary stimulation of, 751
Growth,
studies in Ayrshire cattle, 47

HEAT labile sulfides of milk, 689, 843, 853
Heat stability,
effect of forewarming on, 571, 579
effect of high-temperature-short-time heating, 1071
Heat treatment,
effect on butter oil, 409
Herd test,
composite vs. fresh samples, 665
Homogenization efficiency test, 893, 997
Homogenized milk,
U. S. P. H. S. definition of, 893
Hormones,
diethylstilbestrol, 747
lactation stimulating, 746, 747

ICE cream,
condensed and powdered buttermilk in, 770
flavor, 25, 63
gelatin in, 189
microscopy, 683
mix pasteurization, 37
use of corn sugar in, 1107
war restrictions, 762
Indol content of butter, 505
Insemination, artificial,
breeding efficiency of, 757
effect of semen dilution on, 756
in proving sires, 729
techniques, 483

Irradiation,
ultra violet, 643

KELP meal,
in dairy rations, 754
Ketosis,
development in cows, 754, 1079

LACTATION,
effect of dry period on, 705
effect of thyroidectomy on, 745
hormonal preparation for, 746
persistency,
measure of, 437
genetic aspects of, 447
records,
for evaluating cows, 724
Lactic acid,
fermentation by streptococci, 371
Lecithin,
determination of, 935
Lespedeza,
common vs. alyce clover for cows, 736
Linseed meal,
compared with urea for milk production, 647
Lipase,
activity in cheddar cheese, 773
determination of in milk, 233
in mammary gland tissue, 385, 749
Lipolysis,
in milk, relation of blood carotene to, 987
of homogenized raw milk, 773
Live weight and milk energy yield, 625

MAMMARY gland,
arterial reestablishment, 841
effect of stilbestrol on, 746, 747, 748
growth stimulation of, 751
injury by milking machines, 752
lipolytic activity of tissue, 385
effect of pitocin on, 749
stimulation of, in goats, 751
Manganese,
content of milk, 325
Mastitis,
effect of incomplete milking on, 823
in an experimental herd, 471
whiteside test for, 295
Medicinal flavor,
outbreak in milk, 587
Methyl bromide,
as fumigant, 205
Microbacterium,
study of genus, 533
Microscopy of ice cream, 683
Milk,
ascorbic acid content, 7
carotenoid pigments in, 769
dry, future of, 716
evaporated,
ascorbic acid content, 1031
heat stability of, 571, 579, 1071
high solids, 761
flavor, 1, 25, 419, 1095
medicinal, 587
oxidized, 1, 25, 337, 419, 515, 525, 563
scoring, 63
homogenized,
definition of, 893
efficiency test, 997
lipase, 233
lipolytic activity, 987
manganese content, 325
preservation on the farm, 768
routine plant examination of, 271
sulfides, 679, 843, 853
utilization of supply, 715
Milk energy yield, 625
Milk fever,
nutritional control of, 753
Milking,
effect of incomplete, 823
Milking machines,
action of and udder injury, 752
Mineral and vitamin requirements of cows,
recommendations for meeting, 726
studies, 738
Milk production,
effect of thiamin feeding on, 291
Molasses from citrus fruits, 735
Molasses silage, 732
Mold,
content of cream and butter, 283, 375
mycelia and butter score, 1091
Oospora lactis, 251
mycelia retained by buttermilk, butter and wash water, 768

NEUTRALIZERS,
effect on ash of dry milk, 769
Nutritive value of dairy products,
butterfat, 429

OAT silage,
neutralizers for, 975
Officers and committees of sections, 79
Oospora lactis,
factors affecting growth of, 251
Oxidase-producing bacteria, 1
Oxidation,
effect of heat treatment on, 409
Oxidation-reduction potential,
effect of ascorbic acid on, 515
effect of metals on, 515
Oxidized flavor, 1, 25, 337, 419, 495, 525, 563, 1095

PARTURITION,
effect on vitamin A and carotene of blood, 740
Pasteurization,
ice cream mix, 37
milk for cheesemaking, 771
time and temperature effects, 764
Pasture,
effect on vitamin A of milk, 673
committee report, 353
weed content, 877
Persistency,
measure of, 439
genetic aspects of, 447
Peppergrass,
effect on flavor of butter, 505
pH,
routine plant determination, 271
Phosphatase test,
of refrigerated cream, 343
Phospholipids in dairy products,
determination of, 935
Phosphorus,
content of cottage cheese, 305
content of cow's blood, 738
effect of cocoa on utilization of, 951
Phosphoric acid silage, 732
Plastics,
casein, 591
Poikilocytosis of cattle, 738
Polarized light,
in ice cream microscopy, 683
Prairie hay,
effect of storage on carotene content, 742
for milk production, 735
Proceedings, 38th annual meeting, 777
Production, effect of protein on, 730
Program, annual meeting, 457
Protein,
biological value of, 731
quality, effect on production, 730
supplements for calves, 737
thyroactive, effect on growth, 749
urea as a substitute for, 732
Pseudomonas putrefaciens,
chlorine resistance of, 765
effect on diacetyl and flavor of butter, 943

RENNIN,
crystalline, preparation of, 53
Ration,
soybean and silage, 241
Rennin action, 1043
Repellent fly sprays, 179
Reproduction,
effect of thyroidectomy on in cattle, 744
Review articles,
bacteriology of butter cultures, 83
Rumen gases,
composition of, 929

SALT,
migration in cheddar cheese, 772
Savoureux cheese, 331
Semen,
dilution, 756, 1057
longevity and fertility, 983
measuring quality of, 483
sperm concentration of, 69
Sherbets and ices,
war restrictions, 762
Sires,
measuring transmitting ability of, 727
proving of, 967
Silage,
alfalfa-brome grass vs. corn, 921
and soybean ration, 241
chemical determination of quality, 733
dry matter determination, 545
effect on copper tolerance of milk, 563
fermentation of, 734
methods, 231
molasses and phosphoric acid, 732
oat, neutralizers for, 975

Skim milk,
in animal feeding, 715
Sodium caseinate sols,
electrokinetic properties of, 1043
Soft curd milk,
effect on gastric emptying time, 259
Soybean and silage ration, 241
Spermatozoa,
acid resistance, 756
concentration in semen, 69
Stability,
of evaporated milk, 571, 579
Starters,
lactic, 909
Stilbestrol,
effect on lactation, 746, 747, 748
Streptococcus,
associated with food poisoning, 321
lactic acid fermenting, 371
Sulfides of milk, heat labile,
influence of various factors, 853
method of determination, 689
origin of, 843
Sunshine,
as a source of vitamin D, 743
Sweetening agents, 1107

THIAMINE,
effect of feeding on milk production, 291
Thyroidectomy,
effect upon cows, 744, 745
Thyroprotein,
effect on growth, 749
effect on production, 750
Triacetin,
as a nutrient, 13

ULTRAVIOLET irradiation,
effect on vitamin content of milk, 643
Urea,
as a substitute for protein, 732
compared with linseed meal for production, 647
Utilization of milk supply, 715

VISUAL mold test, 375
Vitamin,
A,
content of milk, 673
effect of irradiation on, 643
oxidation in milk fat, 869
B complex,
antioxidant value, 774
C,
in milk, 7
in evaporated milk, 1031
stimulation of synthesis, 553
synthesis by dairy cows, 401
urinary excretion by cattle, 744
D,
sunshine as a source for cows, 743
requirements of the calf, 1023
riboflavin,
content of milk, 643

WAR restrictions,
applied to ice cream, 762
applied to ices and sherbets, 762
Weed content of pasture forage, 877
Whipping cream,
low fat, 759
Whiteside reaction,
cause of, 295

YEASTS,
lactose fermenting in cream, 767

INDEX

AUTHOR INDEX OF ABSTRACTS

ABELE, C. A., report of committee on sanitary procedure, A178

AHLGREN, G. H., growing more feed, A200

ALBIN, H. C., the government buys food, A41

ALFREDSON, B. V., electrocardiograph studies in dairy cattle, A71

ALVAREZ-TOSTADO, C., studies on new-born calf serum, A67

AMERICAN SOCIETY OF REFRIGERATING ENGINEERS, refrigerating data book, 1942, fifth edition, A189

AMOROSO, E. C., lactation in thyroidectomized rats, A89

ANDBERG, W. G., effect of chemotherapeutic agents on the mammary gland, A198

ANDERSON, E. B., bacteriophage in cheese making, A79

ANDERSON, E. E., dairy cattle feeding and management, A135

ANDERSON, E. O., infectious bovine mastitis, A62

ANDERSON, J. A., mastitis, A34

ANDERSON, T. G., keeping qualities of milk, A50

ANDREWS, FREDERICK N., ascorbic acid-gonadotropic hormone relationships, A91; thyroid function in cattle, A150

ANDREWS, J. T. R., unsaturated fatty acids of edible fats, A160

ANNUAL REVIEWS, INC., annual review of biochemistry, volume XII, A189

ANONYMOUS, pH control in dairy industries, A6; flavor scoreboard, A18; slashing mileage, A19; depreciation rates, A24; delivery and sales, A24; wartime packaging, A26; refrigeration engineering, A26; selection of refrigerating equipment, A41; daylight in factories, A42; war gases and foodstuffs, A42; British animal husbandry, A45; human tuberculosis of bovine origin, A46; preparing dairy plants for blackouts, A56; rationing for ice cream, A64; income and demand, A88; British food industry, A93; preservation of foodstuffs, A93; dehydrated foods, A95; transportation, A95; influence of cooking on vitamin C, A110; antirachitic action of irradiated milk, A111; irradiation of skimmed milk, A114; new Swedish yeast, A117; army rations, A118; food research, A118; lower fat mixes, A137; standards for raw milk, A177; light for the fluid milk industry, A185; sanitary glass piping, A188; smoothing drier drums, A195; ice cream consumption, A218; army orders, A238

ARBUCKLE, W. S., standardization of milk for cheese, A230

AREND, A. G., raw sugar, A89

BAKER, C. T., layout and installation of piping, A117; piping installation, A212

BAKER, M. P., evaluation of some milk tests, A52

BARBER, FRANKLIN W., phosphatase test, A38; factors affecting the phosphatase test, A51

BARKER, C. R., making cheese spreads, A6

BARKWORTH, H., coliform test, A120; rapid platform tests, A144

BARTLETT, DAVID E., infection with *Trichomonas foetus*, A128; distribution of *Trichomonas foetus*, A198

BARTLETT, J. W., maintaining herd replacements, A155; artificial insemination, A190

BAULAND, T. H., war production, A88

BAUMANN, C. A., prothrombin activity, A9

BEACH, B. A., Bang's disease, A63; effect of novoxil on the udder, A132

BEAL, GRACE A., growth of brucella, A227

BEAM, A. L., grain feeding and milk production, A12

BEARDSLEE, C. E., dairy industry under a war economy, A210

BENJAMIN, HELEN R., calcium and phosphorus requirements of infants, A136

BERGMAN, A. J., relation of mammogenic factor to other pituitary hormones, A67; effect of pregnancy and lactation upon the thyrotropic hormone, A69

BETHKE, R. M., riboflavin and thiamine in the rumen, A133

BEVILLE, LAWRENCE, milking machines, A205

BIENDARRA, A. W., salvaging fat from the Babcock test, A212
BIRD, E. W., chemistry of butter and butter making, A228
BLACK, LUTHER A., milk laboratories, A223
BLAIR, G. W. SCOTT, quality of cheese, A80; progress of dairy science, A82; properties of bovine cervical mucus, A107
BLASER, R. E., annual lespedeza for Florida pastures, A199
BLOOM, E., dairy products in nutrition, A164
BLUM, HAROLD F., effect of ultraviolet radiation on body weight, A71
BLUMENTHAL, S., food manufacturing, A1
BODEN, S. M., estimation of solids in milk, A81
BOHSTEDT, G., feeding value of whey, A199
BONYGNE, C. W., calfhood vaccination, A47
BORDEN, R. E., a low-temperature test cabinet, A56
BORLAND, A. A., grain feeding and milk production, A12
BOROWSKY, SYDNEY, influence of minor dietary changes on frequency of infant's stools, A201
BOETS, IRVING H., milk-borne epidemic of brucellosis, A215; brucellosis, A216
BOWMAN, MAXWELL, typhoid fever due to infected cheese, A34
BOWNE, G. D., preventive motor maintenance, A211
BOYD, J. C., selecting cream to make butter, A229
BOYD, WILLIAM C., fundamentals of immunology, A77
BRAUN, WERNER, *Brucella Abortus*, A227
BREAZEALE, D. F., chemistry of butter and butter making, A228
BREED, ROBERT S., quality control for the plant, A148; laboratory control procedures, A222
BREMER, H. E., quality control problems, A144
BRERETON, JOHN G., determination of casein in skim milk, A33
BROOKS, PAUL B., communicable diseases affecting man, A231
BROWN, R. W., wood taint, toppiness and primrose color of butter, A123; fibre butter boxes, A155
BROWN, W. CARSON, Minnesota Babcock method, A236
BROWN, W. H., phosphatase value of cream, A114
BRUCE, ROBERT A., variant of *Salmonella enteritidis*, A196
BRUECKNER, H. J., care of milking machines, A53
BRYAN, C. S., laboratory aid in milk production, A175
BUCK, JR., THEODORE C., false positive phosphatase test, A54
BUEHLER, LEON, operation of refrigeration machinery, A185
BULLARD, J. F., thyroid function in cattle, A150
BULMER, L. C., flaws in milk control policy, A177; unified milk control, A183; frozen desserts sanitation, A235
BÜNGER, H., breeding experiments, A122
BUNK, WILLIAM C., cutting corners in accounting, A151
BURKHOLDER, P. R., synthesis of vitamins by microorganisms in cheeses, A214
BURROUGHS, E. W., riboflavin and thiamine in the rumen, A133
BURROWS, O. K., equipment life and availability, A186; equipment and materials, A239
BURROWS, WILLIAM, oxidation-reduction potentials in salmonella cultures, A44
BURTON, G. W., cow cafeteria evaluates new grasses, A163
BURTON, L. V., metal containers, A28
BUTTERWORTH, T. H., sediment testing, A183
BUTTON, MILTON H., milk quality, A208
BYERS, L. W., fortification of oil, fat, and flour, A202

CAHIKOFF, I. L., metabolism of zinc, A134
CAMERON, W. C., frozen dessert sanitation, A234
CAMPBELL, C. H., estimation of solids in milk, A81
CAMPBELL, I. L., plane of nutrition and milk production, A13; plane of nutrition and milk production, A14; regulation of calcium metabolism, A209
CAMPBELL, M. M., bovine mastitis, A130

CANDILL, FRED W., food poisoning due to pasteurized milk, A160
CANNON, C. Y., freshening date changes, A123
CARPENTER, D. R., evaluation of fluid milk of different fat contents, A111
CARPENTER, L. E., determination of riboflavin, A34
CARR, R. E., cooking qualities of homogenized milk, A21
CASIDA, L. C., induction of superfecundity in cattle, A148
CASTELL, C. H., rancidity in Canadian cheddar cheese, A33; butyric acid anaerobes in cheddar cheese, A60; lipase activity, A176
CAULFIELD, W. J., visual mold test, A4
CHALLINOR, KATHRYN, food-poisoning staphylococci in pasteurized milk, A215
CHAN, M. H., new detergent and sterilizing agents, A187
CHANG, MIN-CHUEH, effects of stilbestrol on sperm production, A90
CHAPMAN, R. A., determination of fat-peroxides, A214
CHRISTENSEN, BERT E., hydrogen-sulfide poisoning, A232
CHRISTMAN, A. A., influence of lactose on the absorption of calcium, A15
CLARK, DWIGHT E., antagonistic effect of lipocaic and the anterior pituitary, A70
CLARKE, MIRIAME F., use of lactobacillus casei in microbiological assay, A126
CLIMENKO, DAVID R., inositol and p-aminobenzoic acid in lactation, A66
COHN, GUNTHER, determination of calcium, A127
COLE, C. L., hydrocephalus, A60
COLE, W. C., use of fruits, A36
COLLIER, JANE, synthesis of vitamins by microorganisms in cheeses, A214
COMBS, W. B., milk and milk products, A119
COPPEN, F. M. V., quality of cheese, A80
CORDERO, TULIO, marshmallow cream, A37
CORLEY, R. T., bacteriological condition of creamery water supplies, A101; water supplies of butter plants, A191
COULTER, S. T., economy through serum solid changes, A36; proper mixtures for the can washer, A51
COWIE, A. T., properties of bovine cervical mucus, A107
COX, G. A., plane of nutrition and milk production, A13; plane of nutrition and milk production, A14
CRONSHAW, H. G., improvise to meet shortages, A93
CROSBY, R. J., meeting the safety problem, A239
CROSSLEY, E. L., manufacture of spray-dried powders, A82; coliform organisms in cheese, A124
CUNNINGHAM, LORNA, *Streptococcus agalactiae* agglutinins in blood and whey, A109
CURRAN, H. R., germination of aerobic mesophilic spores, A98

DACK, G. M., food poisoning, A78
DAHLE, C. D., sherbets and ices, A87; ice cream stabilizers, A138; conserving milk solids, A139
DAKE, H. C., ultra-violet light and its applications, A153
DALLDORF, GILBERT, role of milk in nutrition, A200
DASCOMB, HARRY E., variant of *Salmonella enteritidis*, A196
DAVIS, H. L., mastitis, A34; milk filtration, A207
DAVIS, H. P., conception rate in dairy cattle, A190
DAVIS, JOHN G., resazurin test, A38; the resazurin test, A50; rapid platform tests, A144; resazurin test, A145; dairy detergents, A151; the resazurin-rennet test, A168; pasteurization, A169; milk quality in war time, A170
DEARDEN, D. V., quality of cheese, A80
DELOZIER, H. L., sediment testing, A183
DEMENT, JACK, ultra-violet light and its applications, A153
DESMOND, JOHN, stoneware pumps, A26
DICK, LEO A., studies of brucella, A108; studies of brucella, A109
DIZIKES, J. L., digestion characteristics of various types of milk, A15
DOAN, F. J., digestion characteristics of various types of milk, A15; laboratory control of homogenized milk, A172
DOLBY, R. M., cracked rinds in cheddar cheese, A7

DOLEY, JAMES T., repair of concrete floors, A188
DOLMAN, C. E., bacterial food poisoning, A217
DOOB, JR., HUGO, browning of dried whey and skim milk, A61
DORFMAN, ALBERT, action of sulfonamide compounds, A107
DORNER, W., cheese defects and cheese diseases, A105
DOUGHERTY, R. W., hydrogen-sulfide poisoning, A232
DOWNS, P. A., manufacture of cornhusker cheese, A5
DRAGSTEDT, LESTER R., antagonistic effect of lipocaic and the anterior pituitary, A70
DUBLIN, THOMAS D., milk-borne outbreaks due to streptococci, A121
DUPLAN, J. H., dairy industry in Canada, A146

EASTMAN, J. B., transportation, A115
EATON, ORSON N., seasonal variation in semen of bulls, A190
ECKLES, C. H., milk and milk products, A119
EDEL, HANS, spray drying, A194
EDGELL, J. W., rapid platform tests, A144
EDICK, G. L., a wartime dairy barn, A212
ELLIKER, P. R., phosphatase value of cream, A114
ELVEHJEM, C. A., developments in nutrition research, A165; determination of nicotinic acid, A193
EMMINGER, A. C., *Brucella abortus* in the bovine udder, A131
ENGLAND, C. J., control of product and material costs, A167
ERB, J. H., ice cream coating, A20; chocolate coating, A35; wartime sugar replacement, A114
ERB, RALPH E., ascorbic acid-gonadotropic hormone relationships, A91
ESMOND, C. W., selling to insure business, A117
EVANS, F. R., germination of aerobic mesophilic spores, A98
EVANS, JR., E. A., the biological action of the vitamins, A77
EVELETH, D. F., Johne's disease, A61

FABIAN, F. W., frozen desserts sanitation, A234
FAUSTINI, JOHN, storing cottage cheese, A125
FAY, A. C., delivery restrictions, A172; high-temperature, short-time pasteurizers, A207

CONTENTS

JANUARY, NO. 1

The role of oxidase-producing bacteria in the development of oxidized flavor in milk. J. FRANK CONE AND C. J. BABCOCK 1
Reduced and total vitamin C in milk. DAVID B. HAND 7
A comparison of acetic acid, fed in the form of triacetin, with glucose as a nutrient in feeds. T. B. MCMANUS, C. B. BENDER, AND O. F. GARRETT 13
The prevention of oxidized flavor in milk and ice cream by the use of concentrated milk products. OCREL M. RUSSELL AND CHESTER D. DAHLE 25
Study of short-time-high-temperature pasteurization of ice cream mix. R. DOWD AND E. O. ANDERSON 37
Growth studies with Ayrshire cattle. I. Normal body weights and heights at shoulders for Ayrshire cattle. G. A. BOWLING AND DEXTER N. PUTNAM 47
The preparation of crystalline rennin. C. L. HANKINSON 53
Comparative standardization of butter, cheese, milk and ice cream flavor scoring. G. M. TROUT, P. A. DOWNS, M. J. MACK, E. L. FOUTS, AND C. J. BABCOCK 63
Rapid methods for estimating the number of spermatozoa in bull semen. G. W. SALISBURY, G. H. BECK, IRVINE ELLIOTT, AND E. L. WILLETT 69
Section officers and committees of the American Dairy Science Association 79
Abstracts of literature A1

FEBRUARY, NO. 2

Bacteriology of butter cultures: A review. B. W. HAMMER AND F. J. BABEL 83
The relation between the degree of solidification of fat in cream and its churning time. I. Measurement of the degree of solidification. E. L. JACK AND J. R. BRUNNER 169
Effect of spraying cows with repellent type sprays as measured by milk production. A. O. SHAW AND F. W. ATKESON 179
An explanation of the increased efficiency of gelatin in ice cream mix when initially aged at 68° F. W. S. MUELLER 189
The fumigation of dairy products with methyl bromide. L. S. ROEHM, V. A. STENGER, AND S. A. SHRADER 205
Committee report on silage methods 213
American Dairy Science Association announcements 217
Abstracts of literature A31

MARCH, NO. 3

Some investigations of fly control in dairy barns. F. W. ATKESON, A. O. SHAW, ROGER C. SMITH, AND A. R. BORGMANN 219
Determination of milk lipase. MERLIN H. PETERSON, MARVIN J. JOHNSON, AND W. V. PRICE 233
A soybean and silage ration for dairy cows. N. K. WILLIAMS, C. Y. CANNON, AND D. L. ESPE 241
The optimum temperature of growth of 22 cultures of Oospora lactis. N. S. GOLDING AND D. D. MILLER 251
The relationship between the curd tension of milk and gastric emptying time in children. GIDEON HADARY, H. H. SOMMER, AND JOHN E. GONCE, JR. 259
The use of a direct reading pH meter for routine examination of milk at the dairy plant intake. H. K. JOHNSTON AND F. J. DOAN 271

The value of chlorine in producing low bacterial count milk. J. H. Byers and H. P. Ewalt 277
A rapid method of churning cream into butter for mold mycelia determinations. H. H. Wilkowske and K. M. Renner 283
Association announcements 289
Abstracts of literature A43

APRIL, NO. 4

The effect of thiamin feeding upon milk and fat production. J. K. Loosli and H. L. Lucas 291
Nature of the material in milk responsible for the modified Whiteside test for mastitis. H. O. Dunn, James M. Murphy, and O. F. Garrett 295
The calcium and phosphorus content of commercially made cottage cheese. O. F. Garrett 305
Bactericidal action of radiant energy from special types of lamps on organisms found on dairy utensils and equipment. R. B. Arnold and O. F. Garrett 309
The identity of a streptococcus associated with food poisoning from cheese. J. M. Sherman, K. L. Smiley, and C. F. Niven, Jr. 321
Manganese in cows' milk. J. G. Archibald and H. G. Lindquist 325
Action in cheese ripening of an enzyme preparation from chicken proventriculi, including manufacture of a new type cheese—Savoureux. F. J. Babel, G. F. Stewart, and B. W. Hammer 331
Some factors affecting the stability of certain milk properties. VI. Relation of the concentration of dissolved oxygen to the oxidation of ascorbic acid and to the development of oxidized flavor in milk. G. H. Hartman and O. F. Garrett 337
The development of a positive phosphatase test in refrigerated, pasteurized cream. F. W. Barber and W. C. Frazier 343
Preliminary report on pasture investigations technique. Joint Committee of American Society of Agronomy, American Dairy Science Association, American Society of Animal Production 353
Abstracts of literature A59

MAY, NO. 5

The lactic acid fermentation of streptococci under aerobic conditions. J. C. White and J. M. Sherman 371
An evaluataion of the visual mold test for cream. F. E. Nelson, W. H. Martin, R. W. Morrison, and W. J. Caulfield 375
The lipolytic activity of bovine mammary gland tissue. Philip L. Kelly 385
Evidence of the synthesis of vitamin C by dairy cows. G. C. Wallis 401
Oxidation of butter oil as influenced by previous heat treatment of the oil, butter, or cream. F. C. Ewbank and I. A. Gould 409
Relation of degree of saturation of milk fat to development of oxidized flavor. W. J. Corbett and P. H. Tracy 419
Further studies on the growth-promoting value of butter fat. R. K. Boutwell, R. P. Geyer, C. A. Elvehjem, and E. B. Hart 429
A measure of persistency of lactation in dairy cattle. T. M. Ludwick and W. E. Petersen 439
Some genetic aspects of persistency in dairy cattle. T. M. Ludwick, W. E. Petersen, and J. B. Fitch 447
Program, thirty-eighth annual meeting of the American Dairy Science Association 457
Abstracts of literature A77

JUNE, NO. 6

Observations on mastitis in an experimental herd. E. G. HASTINGS, B. A. BEACH, AND MILDRED JOHNSON 471
Rapid methods for estimating the quality of bull semen. G. H. BECK AND G. W. SALISBURY 483
Influence of several factors upon the amount and stability of carotenoids in frozen cream and its relationship to the metal-induced oxidized flavor. G. M. TROUT, L. A. MOORE, AND M. V. SCHEID 495
Relationship of consumption of peppergrass by cows to the flavor and indol content of butter. R. V. HUSSONG AND SIDNEY QUAM 505
Some factors affecting the stability of certain milk properties. VII. The effects of metals and of ascorbic acids on the oxidation-reduction potential. G. H. HARTMAN, O. F. GARRETT, AND F. C. BUTTON 515
The relation of copper and ascorbic acid to oxidized flavor in market milk. W. F. EPPLE AND B. E. HORRALL 525
A study of the genus microbacterium. M. L. SPECK 533
Dry matter determination in green plant material and in silage. A. E. PERKINS 545
Ascorbic acid stimulation in the blood plasma of dairy cattle produced by the ingestion of chlorobutanol. A. L. BORTREE, C. F. HUFFMAN, AND C. W. DUNCAN 553
Abstracts of literature A97

JULY, NO. 7

Effect of some silages on the copper tolerance of pasteurized milk. C. J. BABCOCK AND H. S. HALLER 563
The effect of various degrees of forewarming upon the heat stability of milks of different solids concentrations. B. H. WEBB, R. W. BELL, E. F. DEYSHER, AND G. E. HOLM 571
Relationships between high temperature forewarming and the color and heat stability of evaporated milks of different solids content. R. W. BELL AND B. H. WEBB 579
An outbreak of a medicinal flavor in market milk caused by aerobacter aerogenes. T. J. CLAYDON 587
Factors affecting the color and clarity of casein plastics. H. F. FICK AND H. H. SOMMER 591
The influence of several factors upon the flavor of frozen sweet cream. G. M. TROUT AND M. V. SCHEID 609
The stability of the fat emulsion of frozen cream. G. M. TROUT AND M. V. SCHEID 619
Live weight and milk-energy yield in the Nebraska station dairy herd. H. P. DAVIS AND R. F. MORGAN 625
The effect of ultra-violet irradiation on the vitamin A, carotene, and riboflavin content of milk. IRVIN FUHR, A. C. DORNBUSH, AND W. H. PETERSON 643
Abstracts of literature A119

AUGUST, NO. 8

The comparative value of urea and linseed meal for milk production. I. W. RUPEL, G. BOHSTEDT, AND E. B. HART 647
Composite vs. fresh samples of milk for determining percentage butterfat of cows on herd test. T. M. OLSON 665
Vitamin A activity of milk as related to pasture and feeding practices in Alabama. C. J. KOEHN 673

Microscopy of ice cream with polarized light. W. D. KELLER, W. H. E. REID, W. S. ARBUCKLE, AND C. W. DECKER 683
A quantitative study of heat labile sulfides of milk. I. Method of determination and the influence of temperature and time. R. C. TOWNLEY AND I. A. GOULD 689
Influence of length of dry period upon the quantity of milk produced in the subsequent lactation. JOHN W. KLEIN AND T E. WOODWARD 705
Abstracts of papers presented at the annual meeting 715
Proceedings of the thirty-eighth annual meeting of the American Dairy Science Association 777

SEPTEMBER, NO. 9

The effect of incomplete milking on chronic mastitis caused by streptococcus agalactiae. O. W. SCHALM AND S. W. MEAD 823
The bacteriology of brick cheese. IV. Control of "early-gas" defect. JOHN C. GAREY, EDWIN M. FOSTER, AND WILLIAM C. FRAZIER 833
Reestablishment of the arterial supply to the udder. DWIGHT ESPE AND C. Y. CANNON 841
A quantitative study of the heat labile sulfides of milk. II. General origin of sulfides and relation to total sulfur, total nitrogen and albumin nitrogen. R. C. TOWNLEY AND I. A. GOULD 843
A quantitative study of the heat labile sulfides of milk. III. Influence of pH, added compounds, homogenization and sunlight. R. C. TOWNLEY AND I. A. GOULD 853
The oxidation of vitamin A and carotene in milk fat. VLADIMIR N. KRUKOVSKY, G. H. ELLIS, AND W. R. PERCY 869
The relation of the kind of pasture crop to the weed content of the forage. W. B. NEVENS 877
A study of the ether extract of the materials estimated as fat in the Babcock test of milk. ERNEST O. HERREID, ROBERT JENNESS, AND DANA W. WHITMAN 883
Abstracts of literature A153

OCTOBER, NO. 10

A critical study of the United States Public Health Service definition for homogenized milk with some recommendations. F. J. DOAN AND R. W. MYKLEBY 893
Factors affecting the development of acidity in pasteurized skim milk inoculated with commercial lactic starters. N. S. GOLDING, H. AMUNDSON, AND R. O. WAGENAAR 909
A comparison of alfalfa-brome grass silage and corn silage for dairy cows. R. K. WAUGH, S. M. HAUGE, J. W. WILBUR, AND J. H. HILTON 921
Bloat in cattle and composition of rumen gases. MAX KLEIBER, H. H. COLE, AND S. W. MEAD 929
Phospholipids in dairy products. II. Determination of Phospholipids and lecithin in lipids extracted from dairy products. J. C. CRANE AND B. E. HORRALL 935
Effect of growth of Pseudomonas putrefaciens on diacetyl and flavor of butter. P. R. ELLIKER AND B. E. HORRALL 943
The effect of cocoa upon the utilization of the calcium and phosphorus of milk. W. S. MUELLER AND MARILYN R. COONEY 951
Influence of various treatments on the bacteria content of frozen cream. F. W. FABIAN AND G. M. TROUT 959
The use of first records versus the average of all records in dam-daughter comparisons when proving sires. DEXTER N. PUTNAM, G. A. BOWLING, AND C. T. CONKLIN 967

Announcement 974
Abstracts of literature A189

NOVEMBER, NO. 11

Comparison of limestone and sodium bicarbonate as neutralizers for phosphoric acid oat silage. W. A. KING 975
The relation of longevity to fertility of bull semen. S. MARGOLIN, J. W. BARTLETT, AND O. L. LEPARD 983
A study of the blood carotene in relation to lipolytic activity of milk. N. P. TARASSUK AND W. M. REGAN 987
Homogenizing efficiency test studies. H. F. JUDKINS 997
A method of equalized feeding for studies with dairy cows. H. L. LUCAS 1011
Certain dietary factors essential for the growing calf. NORMAN S. LUNDQUIST AND PAUL H. PHILLIPS 1023
Observations on the ascorbic acid content of evaporated milk. F. J. DOAN AND D. V. JOSEPHSON 1031
Rennin action in relation to the water binding and electrokinetic properties of calcium and sodium caseinate sols. C. L. HANKINSON AND L. S. PALMER 1043
The effect of dilution rate on the livability and the fertility of bull spermatozoa used for artificial insemination. G. W. SALISBURY, G. H. BECK, P. T. CUPPS, AND IRVINE ELLIOTT 1057
Announcement 1070
Abstracts of literature A213

DECEMBER NO. 12

Effect of high-temperature-short-time heating of concentrated milk upon its heat stability. B. H. WEBB AND R. W. BELL 1071
Studies on ketosis in dairy cattle. J. C. SHAW 1079
The relationship of the score of butter to the mold mycelia grade. JAMES C. BOYD AND J. A. NELSON 1091
The incidence of oxidized flavor in the milk of individual cows within one herd. W. J. CORBETT AND P. H. TRACY 1095
The sweetening powers of corn sugars in ice cream. ALAN LEIGHTON AND OWEN E. WILLIAMS 1107
Agitation and temperature of cheese milk and the development of rancid and unclean flavours in cheddar cheese. I. HLYNKA, E. G. HOOD AND C. A. GIBSON 1111
Circulation of the Journal of Dairy Science 1121
Author index of original articles 1155
Subject index of original articles 1161
Abstracts of literature A227
